## WE PRODUCE COMPOSTABLE COMPOUND

At Shivish where we are revolutionizing the manufacturing landscape with our innovative compostable compound and bio granules solutions. In a world facing escalating environmental challenges, the need for sustainable alternatives has never been more pressing. Our commitment to sustainability drives every aspect of our operations, from sourcing raw materials to delivering cutting edge products that address the urgent need to reduce plastic pollution and minimize waste. As we specialize in creating compostable compounds that not only meet but exceed industry standards for eco-friendliness and performance. Our state of the art manufacturing processes leverage the latest advancement in materials science and technology to produce high quality, versatile solutions for a wide range of applications.

## COMPOSTABLE HEALTHCARE & HYGIENE

At SHIVISH where sustainability meets healthcare and hygiene in our pioneering manufacturing of compostable products. In an era where the importance of environmental stewardship is increasingly evident we are proud to Offer innovative solutions that prioritize both the well being Of individuals and the planet. AS We understand the critical role that healthcare and hygiene products play in maintaining public health and safety.

That is why we have dedicated ourselves to developing compostable alternatives that not only meet the highest standards Of performance and effectiveness but also minimize environmental impact With our range Of compostable healthcare and hygiene products,

Whether it is in a healthcare facility, hospitality industry, or simply seeking eco friendly options for personal hygiene, Our compostable products provide a sustainable and reliable solution.

## ENVIRONMENTAL IMPACT

**REDUCED PLASTIC POLLUTION:** Compostable products help mitigate the detrimental effects of plastic pollution by providing an alternative to traditional plastics that can persist in the environment for hundreds of years,

**BIODEGRADABILITY:** Compostable products break down naturally into organic matter, water, and carbon dioxide through microbial action in composting environments. This process reduces the accumulation of waste in landfills and minimizes the release of harmful chemicals into the environment.

**SOIL ENRICHMENT:** When compostable products decompose, they contribute valuable nutrients to the soil, enhancing soil health and fertility. This nutrient rich compost can improve soil structure, moisture retention, and nutrient availability, supporting plant growth and biodiversity,

## COMPOUND GRADES

| SR.NO. | GRADE NAME | APPLICATION       |
|--------|------------|-------------------|
| 1      | SGBIO-101  | MILKY BLOW FILLER |
| 2      | SGBIO-102  | MASTER BATCH      |
| 3      | SGBIO-103  | TRANSPARENT FILM  |
| 4      | SGBIO-104  | STRETCH FILM      |
| 5      | SGBIO-105  | SLIP - GRANULES   |
| 6      | SGBIO-106  | OB - GRANULES     |
| 7      | SGBIO-107  | MOISTURE GRANULES |
